

LOEWE - Landes-Offensive zur Entwicklung Wissenschaftlichökonomischer Exzellenz

MALE INFERTILITY **Microbiology and Inflammation** in Urogenital Infections (MIBIE) Summer School 2014, 31st, July - 2nd, August

In cooperation

www.mibie-summerschool-giessen.de

TOPICS

LOEWE - Landes-Offensive zur Entwicklung Wissenschaftlichökonomischer Exzellenz

- Disorders of Male Infertility
- **Urogenital Infections**
- Inflammation: definitions and the inflammatory cascade
- Urogenital Infections / Inflammation and Infertility
- Clinical aspects of diagnosis and therapy

WHAT TO EXPECT

During this summer school you will learn about the cutting edge of science in urogenital infections and inflammations and their relation to male infertility.

This summer school offers translational access to all fields of male infertility, covering basic science of reproduction, animal models and clinical diagnosis and therapy. The entire field of urogenital microbiology, encompassing diagnosis, description of inflammatory processes and host response in the urogenital tract, as well as the influence of metabolic processes are demonstrated. Translational aspects for clinical diagnosis and therapy are discussed.

There is ample room for discussion at the end of the summer school in detail with participants interested in special aspects of science and practical work.

VENUE

Biomedizinisches Forschungszentrum Seltersberg Schubertstraße 81, 35392 Gießen, Germany

REGISTRATION

There is a registration fee of 30€ and the number of attendants is limited. A travel support will be granted after presentation of the documents mentioned.

Katharina Endres

Tel.: 0641/985-44502 Fax.: 0641/985-44519 Katharina.Endres@chiru.med.uni-giessen.de

NECESSARY DOCUMENTS

- Curriculum Vitae (short biosketch)
- Interests and motivation to attend
